

# RICE THRESHER

MOBILE RICE THRESHING MACHINE

PTO OPERATED

HIGHLY EFFICIENT

**MADFI**

# DESCRIPTION

PTO operated mobile rice threshing machine – similar to conventional wheat thresher.

Axial-flow Threshing Mechanism. The machine takes input of the crop from one end.

The grains are separated and further processed on vibrating sieves where they receive air blow for cleaning. Processed grains are discharged from the exit output. The left over un-threshed material is recycled through the threshing drum with the help of an auger conveyor.
